

EVAXION

European CEO names Evaxion CEO Niels Møller Best CEO in the Vaccination Industry 2016

July 16, 2016

Niels Møller, Evaxion CEO, gets awarded Best CEO in the Vaccination Industry 2016. As we are closer than ever before to understanding the human body on a genetic level, billions of genetic sequences can be processed every day, transforming a biological challenge into a big data one. Led by CEO and co-founder Niels Møller, Evaxion Biotech is tackling that big data challenge to develop meaningful healthcare interventions.

Pioneering the use of bioinformatics, Evaxion has constructed platforms capable of predicting, ranking and optimizing antigens and epitopes that elicit a protective immune response against infectious diseases and cancers. Evaxion is leveraging these platforms to build a solid pipeline of vaccines against diseases with a high medical need.

The screenshot shows the top of the European CEO website with navigation links for Profiles, Business of Management, Finance, Lifestyle, Videos, and Awards. The main article is titled "Immuno-informatics could solve the world's health problems" by author Niels Møller. The article text discusses how harnessing big data is leading the path to develop treatments that utilize natural immunity to fight disease. A sidebar on the right lists related topics such as "The new Black: And Dumas leads luxury giant Hermès to record profits" and "Who competes near state planning for the next geopolitical disruption".

The screenshot shows a video player on the European CEO website. The video title is "Artificial intelligence is helping the fight against cancer" by Evaxion Biotech. The video thumbnail features a 3D molecular model and the text "BIG DATA IN HEALTHCARE". Below the video player, there are two "RELATED VIDEOS" listed: "1. Covid set to sell the Body Shop for \$1.1bn" and "3. Uber CEO Travis Kalanick to take indefinite leave of absence".
